

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

scientific name except in a reference to the origin of the domestic pigeon. The A. O. U. numbers are given in parentheses and the A. O. U. vernacular names are used with the addition of others when necessary. Thus is a matter that seems to trouble many bird students, easily disposed of! If the use of scientific names were limited to scientific publications there would be far less criticism of the changes in them. Miss Miller's little book is an excellent model for a present day local list for the use of the amateur bird student who wishes a reliable and helpful hand book.—W. S.

Recent Papers by Bangs.—In 'The Auk' 1918, p. 441, Mr. Arthur T. Wayne states that on two occasions he saw Black-throated Green Warblers, in the maritime region of South Carolina, building a nest and carrying nesting materials during April. Mr. Bangs¹ now describes one of these April birds as a new subspecies and states that Mr. Wayne sent him a series of seven specimens all of which differed from northern birds in the same way — *i. e.*, in duller coloration and smaller bill. The new form is named *D. virens waynei* (p. 94). In another paper² he discusses the species of the genus *Paecilonitta* as it is now to be spelled, following the original publication. He recognizes *P. bahamensis bahamensis* (Linn.), Florida to Brazil; *P. b. rubrirostris* (Vieill.), from southern South America; *P. galapagensis* Ridgw., Galapagos Isls.; *P. spinicauda* (Vieill.) southern South America; and *P. erythrorhyncha* (Gmel.), Madagascar and Africa.

Peles (p. 92) is proposed³ by Mr. Bangs as a new genus for *Caprimulgus binotatus* Bp.—A review of the South American Short-eared Owls⁴ leads him to recognize three neotropical races. These are *Asio f. brevicaudus* (Schlegel) from southern South America; *A. f. bogotensis* Chapman, from the Bogota Savanna, and *A. f. sanfordi* (p. 97) subsp. nov., from the Falkland Islands.

Another paper⁵ deals with the races of *Dendroica vitellina* Cory, and a new form is described from Swan Island which Mr. Bangs names *D. v. nelsoni* (p. 494). It is somewhat intermediate between the other forms — the typical race of Grand Cayman and *D. v. crawfordi* Nicoll, from Little Cayman and Cayman Brac.—W. S.

Economic Ornithology in Recent Entomological Publications.—Items pertaining to this subject continue to accumulate slowly. Those on hand pertain to the following insects:

¹ A New Race of the Black-throated Wood Warbler. By Outram Bangs. Proc. N. E. Zool. Club., Vol. VI, pp. 93-94. October 31, 1918.

² Notes on the Species and Subspecies of *Paecilonitta* Eyton. By Outram Bangs. *Ibid.*, pp. 87-89. October 31, 1918.

³ A New Genus of Caprimulgidae. By Outram Bangs. *Ibid.*, pp. 91-92. October 31, 1918.

⁴ Notes on South American Short-eared Owls. By Outram Bangs. *Ibid.*, pp. 95-98. February 8, 1919.

⁵ The Races of *Dendroica vitellina* Cory. By Outram Bangs. Bull. Mus. Compar. Zool. Vol. LXII, No. 11, pp. 493-495. January, 1919.
